UDAY MALLAPPA

University of California at San Diego ⋄ 9450 Gilman Dr. #80351 ⋄ La Jolla, CA 92092-0100
udaymallappa@gmail.com, +1 858-281-9076

RESEARCH INTERESTS

VLSI physical design fundamental algorithms and optimization frameworks; Accelerating design convergence using learning algorithms.

SKILLS

Languages	Tcl, Perl, Python, Verilog, C++;
EDA Tools	Design Compiler; PrimeTime; IC Compiler, Innovus; RedHawk HSPICE
Math/Statistics Tools	Matlab, CPLEX

EDUCATION

Ph.D. in Electrical and Computer Engineering — Sep. 2017 - Present
University of California — San Diego
Advisor: Prof. C. K. Cheng — (CGPA: 3.9/4.00)
Related Courses: VLSI Digital System Algorithms and Architectures, VLSI Integrated Circuits and Systems Design, Algorithmic & Optimization Foundations for VLSI CAD, Principles of Computer Architecture, Advanced Microarchitecture (Accelerated Learning), Principles of AI: Probabilistic Reasoning & Decision-Making, AI: Learning Algorithms, Design & Analysis of Algorithms, AI: Search & Reasoning.

B.E. & M.S (Dual Degree in Electrical & Electronics Engineering, Physics) — Aug. 2006 - Jul. 2011
BITS-Pilani — India

WORK EXPERIENCE

VLSI Lab, Univesity of California at San Diego — Sep. 2019 - Present
Teaching Assistant for ECE 260A, VLSI Digital System Algorithms and Architectures

Synopsys Inc — Jun. 2019 - Sep. 2019
Research & Development Intern (Machine Learning) — *Mountain View, CA*

– Using learning algorithms to predict downstream design outcomes. In particular, the goal is to predict crosstalk delay at pre-route stage of the design, that eventually guides routing optimization engine and improves design convergence.

VLSI CAD Lab, University of California at San Diego — Sep. 2017 - June 2019
Graduate Student Researcher — *La Jolla, CA*

– Machine learning in EDA to accelerate design convergence. In particular, using machine learning models to reduce heavy runtimes invested in timing analysis, without loss of accuracy.
– Integer Linear Programming and Simulated Annealing for macro placement.
– Fast ML-LP (Machine Learning-based Leakage Prediction) to predict leakage power recovery.
– Template-based Power Delivery Network construction for better routability.

Intel Corp — Jan.2016 - Aug 2017
SOC Design Engineer — *Bangalore, India*

– RTL-GDS physical implementation and SoC power optimization for $10nm$ baseband processors.

Qualcomm, Inc Nov. 2012 - Jan. 2016
Senior Engineer *Bangalore, India*

– SoC Power Delivery Network Signoff for sub-28nm technology nodes.
– SoC Chip-Package co-analysis, thermal, ESD analysis for sub-28nm technology nodes.

ANSYS, Inc Aug. 2011 - Nov. 2012
Engineer *Bangalore, India*

– Clock-Jitter analysis using Apache Timing Engine and RedHawk product evaluations.

Hewlett-Packard - Imaging and Printing R & D Hub. Jan. 2011 - Jul. 2011
Research Intern *Bangalore, India*

– Image processing algorithms for shadow removal applications, intended for HP 3-D scanners.

PUBLICATIONS

All papers with Prof. Andrew B. Kahng, have authors listed in alphabetical order by last name.

OTHER ACTIVITIES

UCSD ECE department fellowship, Sep. 2017 - June 2018.

Panel Coordinator for annual technical festival of BITS

General Secretary for physics society of BITS

Professional Assistant for the Course: Artificial Neural Networks, BITS

Teaching Assistant for a graduate course & an under-graduate course at UCSD
